# Jeevan M R

Engineering @ JustWorks | Building AI agents  
Bengaluru South, Karnataka, India

## Summary

Experienced Full-Stack Developer with a history of working in fast-paced startups and building their products from the ground up.  
Recently turned Tech Entrepreneur and launched a SaaS product.

---

## Experience

**Justworks**  
Senior Software Engineer  
October 2023 - Present (2 years 2 months)

**Via.work**  
Senior Software Engineer  
July 2023 - September 2023 (3 months)  
Acquired by JustWorks

**Freelance**  
Full-stack Developer  
May 2018 - July 2023 (5 years 3 months)

**FluxForms**  
Co-Founder  
January 2022 - November 2022 (11 months)  
Greater Bengaluru Area

FluxForms is a no-code form builder that lets you create stunning forms, collect responses, and analyze them using sentiment analysis. You also get powerful integrations, automation, and a micro-CMS to manage your responses without having to pay for multiple apps or move around across platforms.

**Esports One**  
Full Stack Engineer  
April 2021 - February 2022 (11 months)  
Remote

Took part in building the core product of the company, the fantasy league platform. Led the efforts in refactoring the code and improving the performance

by 10x, adding new features, fixing bugs, reviewing the code of other teammates, and assisting in deployments.

Worked on an NFT launch that included features like crypto wallet login, invoking blockchain transactions for claiming the token w/ and w/o a gas fee on the polygon network. It saw more than 10,000 people claiming the tokens within a few hours of launch.

### JarvixX

Frontend Developer

May 2019 - January 2020 (9 months)

Remote

As a sole frontend developer built the entire frontend app from the ground up using ReactJS, Redux. JarvixX was a product listing platform for blockchain projects, sort of a ProductHunt for web3 projects. Implemented as per design, connected with the APIs, and handle different user roles and permissions. It even had features like 1-1 Chat, Group Chat, Threaded Comments, etc., which were successfully handled.

### FootLoose Labs

Robotics Engineer

October 2018 - March 2019 (6 months)

Bangalore

Built a robot-os from scratch with protocols enabling communication between different nodes in the robot for signalling motor movements, recording sensory information, etc.

Applied Kalman Filter on IMU data to obtain noiseless information.

### Airtory

Senior Software Engineer

March 2018 - October 2018 (8 months)

Bangalore

Built a highly customised e-commerce store using Magento2. Built a lot of custom plugins for payments, e-agreements, performance optimisation, etc. Also, built a data synchronisation tool using Python/Django.

### Datami

Full Stack Engineer

March 2015 - July 2016 (1 year 5 months)

Bangalore

Worked on the web-portal enabling ad-campaign management and viewing campaign analytics.

Used golang as the backend language with MySQL Database and AngularJS on the front-end.

Also, worked on a bit of Kafka and Zookeeper.

---

## Education

Dayananda Sagar Institutions

Bachelor of Engineering - BE, Information Science/Studies · (2012 - 2015)
